

Storage Integrations

Published on 03/12/2019

Streamline your file management process by connecting ignite to Box, Dropbox, and Google Drive. Once enabled, you can use these integrations to select and upload files for review in Requests, Projects, Tasks, and Proofs.

Storage integrations are only available for Business and Enterprise customers.

Setting up Your Storage Integrations

To set up your storage integrations, navigate to **Personal Settings** by selecting your avatar in the bottom of the global navigation bar and select **Integrations**.

Click the toggle to the right of the **Integration** feature to turn this on. When disabled, the toggle will appear grey. You can update these preferences at any time.

Settings	Integrations
ACCOUNT SETTINGS General Roles	STORAGE Box View, upload, and share files directly from Box.
Permissions Tags Custom Fields	Connect Account Dropbox View, upload, and share files directly from Dropbox.
Work Statuses	Google Drive View, upload, and share files directly from Google Drive.

Upon logging in, you will be prompted to grant access to the integration.

In Box, you will be prompted to **Grant access to Box**. In Dropbox, you will be connected immediately after signing in. In Google Drive, you will be prompted to **Allow**.

After confirming ignite's access, you will have the opportunity to upload files from your connected account throughout the system.

Using Storage Integrations

Once connected, click Add Files from Requests, Projects, Tasks or Proofs and select Add from...
