

# Release Notes 1.4.0

Published on 05/01/2018

## New Features

### URL Review

Now you can add websites to proof assets with the new [Capture Webpage](#) feature. This allows users to review web content and access all of the page's functionality right from the review environment.

## Improvements

- Work list grouped by status will now always show the To Do header on the page so that you can quickly add new tasks or proofs to your list.

- Project name on a work slide-out is now a hyperlink.

- The ability to create and delete work groups in a project is now tied to the Create Project Work and Delete Project Work permissions.
