Duration Definitions

Duration Metrics are calculated every day at 6am and 6pm ET

Request Duration: The total amount of time starting when a request is created and ending when it is marked as any "Completed" status.

Campaign Duration: The total amount of time starting when a campaign is created and ending when it is marked as any "Completed" status.

Project Duration: The total amount of time starting when a project is created and ending when it is marked as any "Completed" status (including custom project statuses).

Work Duration: The total amount of time starting when a work item is created and ending when it is marked as any "Completed" status.

Task Duration: The total amount of time starting when a work item is created and ending when it is marked as any "Completed" status.

Proof Duration: The total amount of time starting when a proof is created and ending when it is marked as any "Completed" status.

Current Version Duration: The total amount of time the current version of a proof is in the "In Review" status.

Overall Review Duration: The total amount of time all versions of a proof are in the "In Review" status.

Reviewer Duration: Available only in the Reviews Report. The total amount of time starting when a review is sent to the reviewer and ending when the reviewer submits their approval status. Any proofs currently in review are not included until they return. This is most helpful for closed projects/ work.

If you have [Business Days](https://guide-ignite.inmotionnow.com/help/business-days) enabled, all durations will exclude non-business days.

Available Filters

Here are the filters you can use with each report type:
