

Release Notes 1.15.0

Published on 10/09/2018

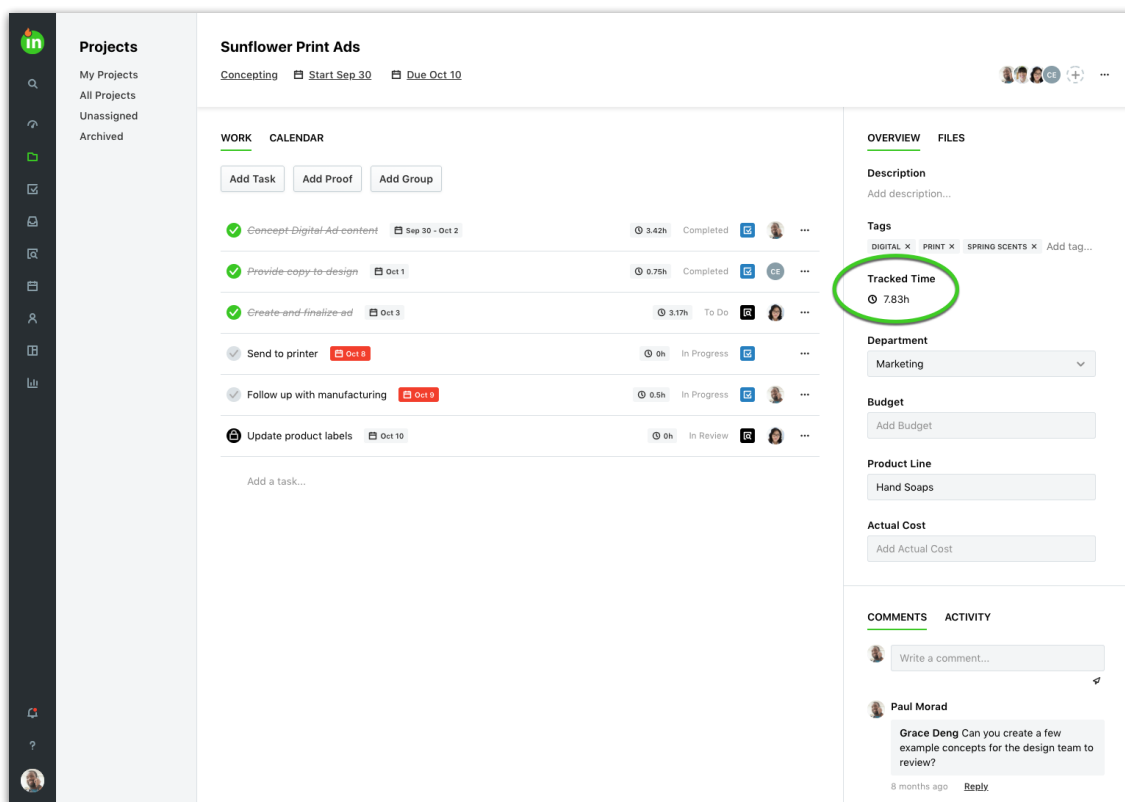

New Features

Associate Requests to Traffic Managers

Need more control over which traffic manager gets assigned to approve each request? Now you can automatically notify and assign specific users to a request based on the information provided in each form! [Reach out to our Customer Success team](https://guide-ignite.inmotionnow.com/help?to=/help/contact-feedback) (<https://guide-ignite.inmotionnow.com/help?to=/help/contact-feedback>) to configure this feature.

Time Tracking Enhancements

Now that you can view total time tracked on each task or proof within a project, the project details view is even more helpful.

The screenshot shows the 'Sunflower Print Ads' project details in the inMotionNow interface. The 'Tracked Time' field is highlighted with a green circle, indicating the total time tracked for the project, which is 7.83h. The interface includes a sidebar with navigation options, a main content area with a task list, and a right-hand panel with various project details and a comments section.

Task	Status	Due Date	Time Tracked
Concept-Digital-Ad-content	Completed	Sep 30 - Oct 2	3.42h
Provide-copy-to-design	Completed	Oct 1	0.75h
Create-and-finalize-ad	To Do	Oct 3	3.17h
Send to printer	In Progress	Oct 8	0h
Follow up with manufacturing	In Progress	Oct 9	0.5h
Update product labels	In Review	Oct 10	0h

In addition, we've introduced a new permission that allows managers to track and edit time on behalf of others.

Requests

Approve Request
[Edit](#)

Users with this permission can approve a request to provide work to Team Members.

Create Request
[Edit](#)

Users with this permission can create a work request for your team.

View All Requests
[Edit](#)

Users with this permission can view all requests. Without this permission, users can only view requests they have created or are allowed to approve.

Projects

Create Project
[Edit](#)

Lastly, say goodbye to making sure your team is tracking the time they're supposed to! We've added a new setting that enables you to require users to enter time before they can complete their work.

Time Required For Completion

Users cannot complete tasks or proofs until time has been tracked.

☒

Improvements

- Activity feed now tracks the addition, update, and deletion of time
- Added pagination to the All Projects and All Work views

The screenshot displays the 'All Work' view in the inMotion USA application. The left sidebar contains navigation options: 'Work' (selected), 'Assigned to Me', 'My Tasks', 'My Proofs', 'ALL WORK', 'Tasks', 'Proofs', 'All', 'Unassigned', and 'Archived'. The main content area shows a list of tasks under the 'All Work' heading. The tasks are listed with checkboxes, dates, and status indicators. A pagination dropdown menu is open, showing options for '20 per page', '50 per page' (selected), and '100 per page'. The bottom of the page shows '1-20 of 66' items and a pagination bar with page numbers 1, 2, 3, 4, and a '20 per page' indicator.
