

Release Notes - May 15, 2019

Published on 05/02/2019

New Features

Requester Insights

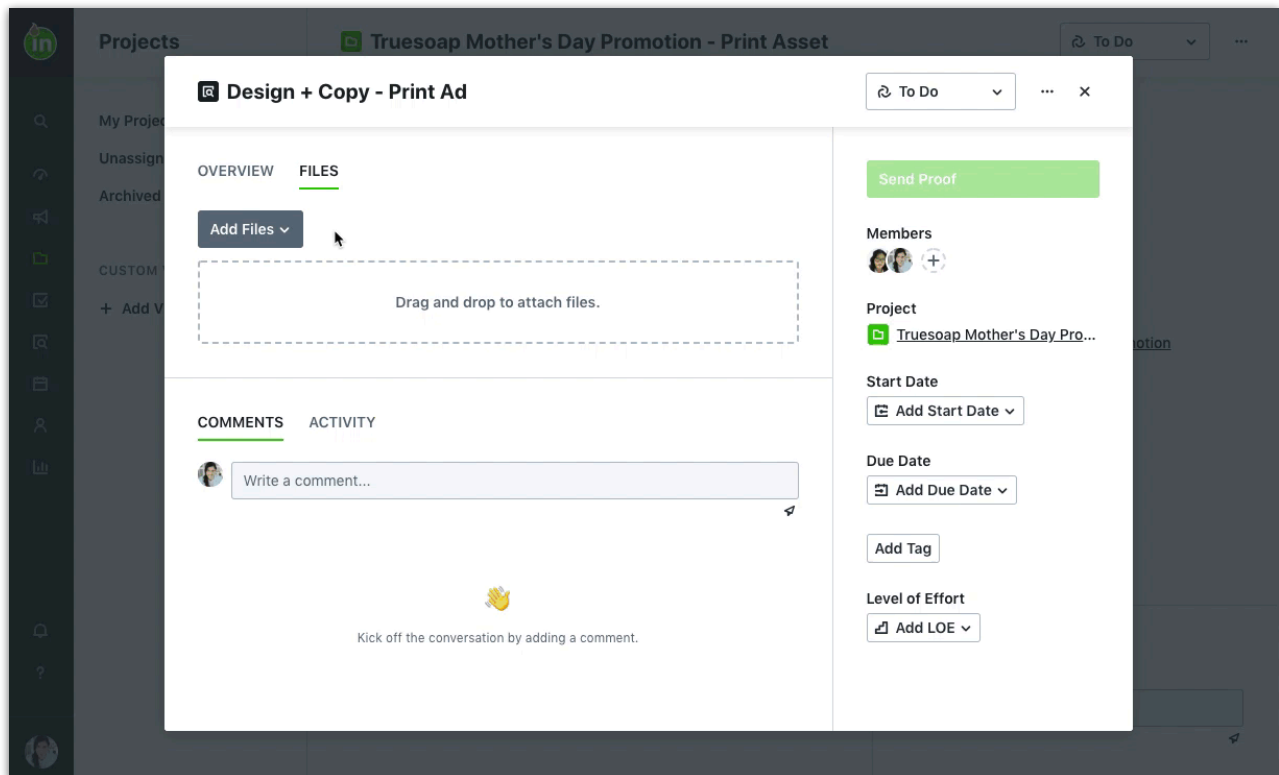

Need help keeping your requesters in the loop? Now, with Requester Insights, requesters have access to dashboards to easily track the progress and expected delivery dates for the work they need! Users with Admin permissions can [enable this feature](http://guide-ignite.inmotionnow.com/help/request-permissions) (<http://guide-ignite.inmotionnow.com/help/request-permissions>) for the account.

The screenshot displays the inMotion dashboard for a user named Chisty Drucker. The main section is titled 'Truesoap Mother's Day Promotion' and shows a 'Request Progress' timeline with four stages: Created (May 6), Submitted (May 6), Accepted (May 6), and Complete (May 7). Below the timeline, three boxes indicate progress: '1 / 3 Projects Completed', '2 / 2 Proofs Completed', and '1 Day Remaining'. The 'Deliverables' section shows a single item: 'digital ad- mother's day promo'. The 'Work Status' section shows a 'New Group' and a 'Truesoap Mother's Day Promotion - Digital + Email' group with a 'Completed' status. The right sidebar contains details such as 'Members' (Chisty Drucker), 'Due Date' (May 7), 'Request Form' (Campaign Request), 'Associated Work' (Truesoap Mother's Day Promotion), and 'Tags' (CAMPAIGN, HOLIDAY P...). The bottom right corner features a 'COMMENTS' section with a text input field.

Google Drive, Google Docs & Dropbox Integrations

It's easier to access your files in cloud storage than ever before! With the inMotion ignite integrations to Google Drive, Google Docs, and Dropbox, you can upload files directly from your preferred solution into ignite for Requests, Campaigns, Projects, Tasks, and Proofs. Once you [enable the integration](http://guide-ignite.inmotionnow.com/help/integrations) (<http://guide-ignite.inmotionnow.com/help/integrations>) in your Personal Settings, you'll be able to focus on collaborating on files while streamlining your workflow and saving time.

Clearer Review Statuses

Getting mixed messages from your reviewers? Returned proofs will now indicate the exact status set by each reviewer for each file, so your designers can quickly turn around new versions or final deliverables.

Improvements

Statuses in lists views of tasks, proofs, projects, and campaigns are now color coded.

Completed			...
In Review			...
In Progress			...
To Do			...

All task/proof related notifications now include associated projects and/or campaigns.

Files can now be removed while they are being uploaded.

Proofs can now be searched by the Proof Subject.
