# Release Notes - November 4, 2019

Published on 10/23/2019

New Features

Bulk Actions: Archive, Unarchive, and Delete

Do you ever need to archive or delete multiple tasks, proofs, or projects all at once? Now you can with Bulk Archive and Bulk Delete functions in ignite! Use Bulk Archive to keep your workspace clear of work items that are finished or Bulk Delete to remove work items you don't need, all in just a few clicks.

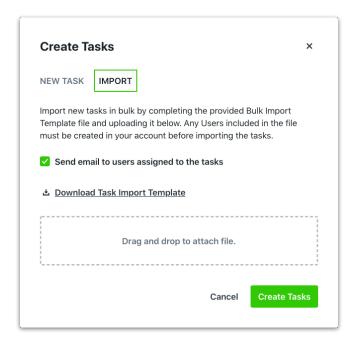

> ℹ️ Bulk Archive, Unarchive, and Delete are available in Custom Views only.

Task Import

Do you have your next month or quarter planned out? Save time by importing all your tasks into ignite at once with Task Import.

Create Tasks ✕

NEW TASK   IMPORT

Import new tasks in bulk by completing the provided Bulk Import Template file and uploading it below. Any Users included in the file must be created in your account before importing the tasks.

☑ **Send email to users assigned to the tasks**

⤓ Download Task Import Template

Drag and drop to attach file.

Cancel   **Create Tasks**

Improvements

Admins can now update users' email addresses (http://guide-ignite.inmotionnow.com/help/managing-users) on the **People** page.

Users with the **Delete Projects** permission are now also assigned the permission to **Delete Work in a Project**

Users with the **Delete Campaigns** permission are now also assigned the permissions to **Delete Projects in a Campaign** and **Delete Work in a Project**.
