

Release Notes - February 24, 2020

Published on 02/18/2020

New Features

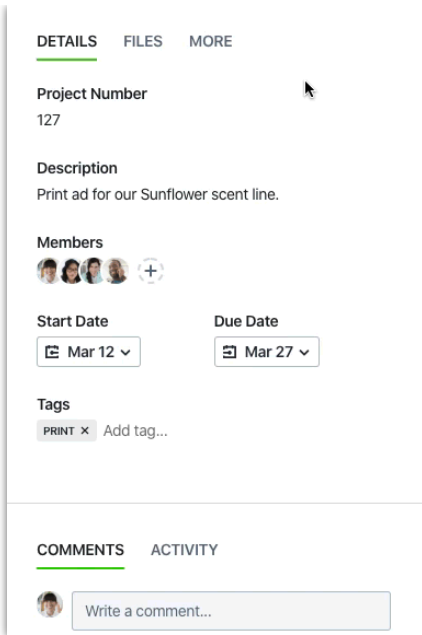

Required Custom Fields

Take your custom fields to the next level with [Required Custom Fields](#) (<http://guide-ignite.inmotionnow.com/help/custom-fields#creating-custom-fields>)! Make sure that projects and campaigns are created with the most important details from the start to ensure proper direction around the scope of work involved, as well as consistent data entry for accurate reporting.

Pinned Custom Fields

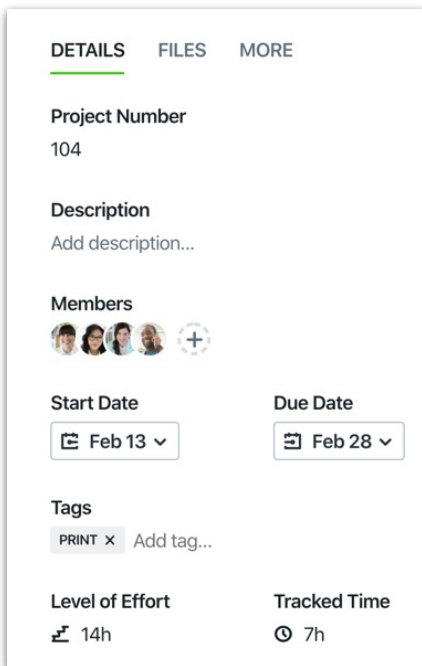

Do you often find yourself scrolling through multiple custom fields in the project or campaign detail view just to find the info you need? Now you can [pin custom fields](#) (<http://guide-ignite.inmotionnow.com/help/custom-fields#using-custom-fields>) to easily surface those key pieces of information and keep campaigns and projects moving!

Improvements

Overdue notifications will no longer be sent for archived items that were not completed.

Horizontally aligned Start/Due Dates and Level of Effort/Tracked Time on Project and Campaign detail views for better visibility of information.

The following date column headers in [Reports](http://guide-ignite.inmotionnow.com/help/reporting-reference-guide) (<http://guide-ignite.inmotionnow.com/help/reporting-reference-guide>) have been updated for clarity:

- **REQUEST SUBMITTED** is now **REQUEST SUBMITTED DATE**
- **CREATED** is now **CREATED DATE**
- **STARTED** is now **START DATE**
- **DUE** is now **DUE DATE**
- **COMPLETED** is now **COMPLETED DATE**
