

Release Notes - August 3, 2020

Published on 07/29/2020

Improvements

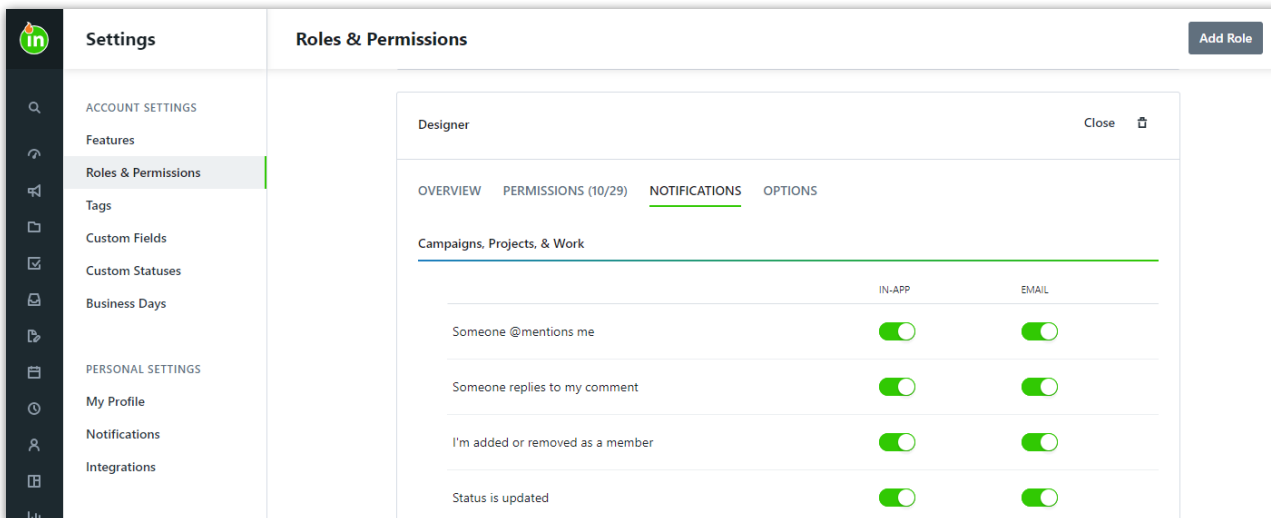

Detailed Notification Preferences

Want even more control over the notifications you receive? Now team members can choose which work items send notifications (<https://guide-ignite.inmotionnow.com/help/notifications#notification-preferences>) so that every email or in-app alert is relevant and helpful.

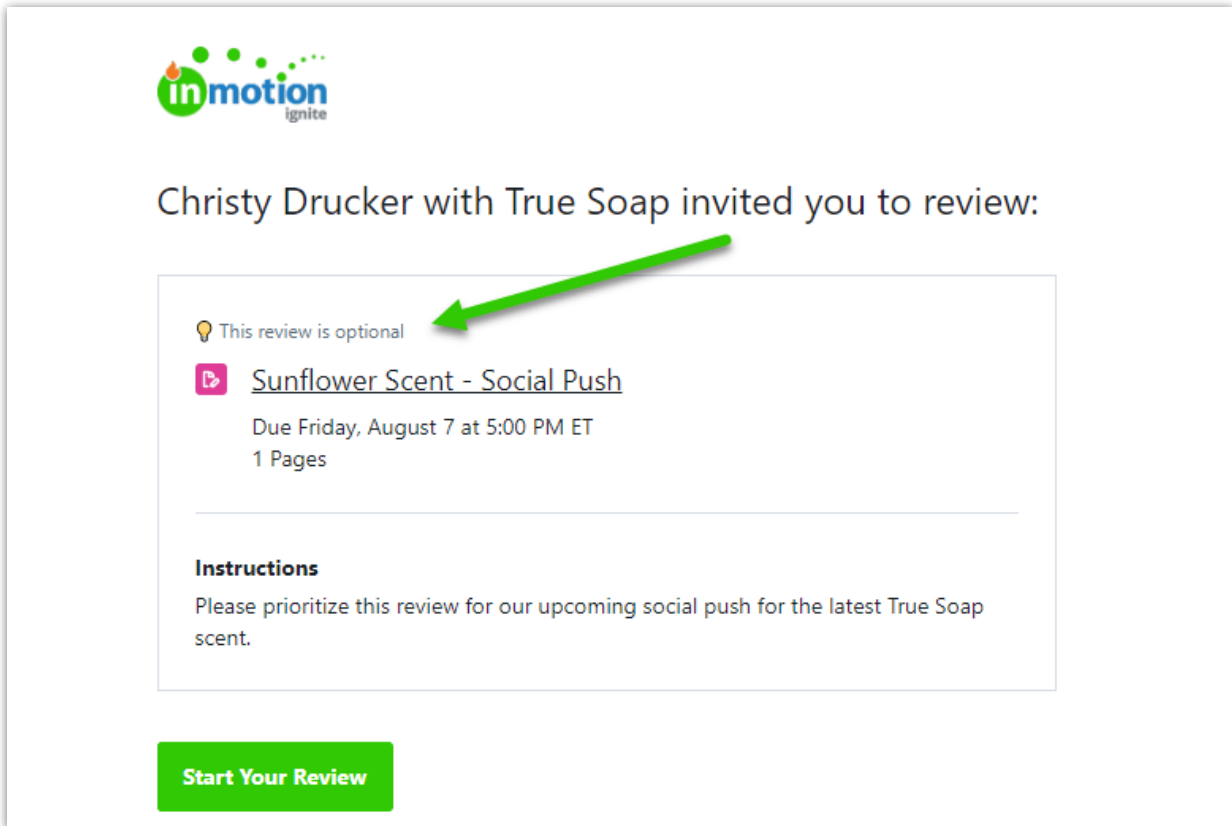

Enhanced Role Management

Make sure your newest teammates are getting the notifications they need from the get-go. Admins now have the option of setting default Notifications and Options settings for each role so newly created users can get started quickly without needing to immediately update their settings. Additionally, these settings are preserved when copying an existing role.

Optional Reviewers Get More Context

Now reviewers will know when they are optional on a review! We've added some additional details on the review invitation and reminder notifications that will help set expectations on their role in that review.

Fixes

- “Add me to anything I create” automatic membership option no longer applies to work created in a project template
- Requests will no longer be shared with the existing requester or members if @mentioned in the comments

Feeling nostalgic? Here's what we released...

- **Six months ago** (<https://guide-ignite.inmotionnow.com/help/release-notes-1-13-2020>)
- **One year ago** (<https://guide-ignite.inmotionnow.com/help/release-notes-7-29-2019>)
- **Eighteen months ago** (<https://guide-ignite.inmotionnow.com/help/release-notes-02-02-2019>)
- **Two years ago** (<https://guide-ignite.inmotionnow.com/help/release-notes-1-10-0>)
