# Release Notes - November 2, 2020

Published on 10/30/2020

New Features

**Visualize Project Schedules Ahead of Creation***

Automatic Date Calculations in Gantt View provides an easier and more visual way to set up start and due dates and dependencies. Pop over to the Calendar tab in your project templates where you'll be able to take advantage of both drag and drop functionality as well as manual entry to visualize project schedules ahead of creation.

Automatic Date Calculations, Gantt Views, and Dependencies are only available for Business and Enterprise customers.

Improvements

Campaign* list views will now show LOE and time tracked as aggregated from tasks in projects.

Campaigns are only available for Business and Enterprise customers.

Feeling nostalgic? Here's what we released...
