

# I was reinvited to Lytho Workflow. Why is my new invitation link not working?

Published on 12/01/2020

If you were invited to Lytho Workflow more than once, and you are nesting emails using an email service like Gmail, it is possible that you are using an old activation link. Some email clients show the original email first, not the most recent email. Open the full email thread to view the most recent activation link.
