Improvements

Quickly Add Work Items and Projects into Specific Work Groups

Work groups (<https://guide-ignite.inmotionnow.com/help/work-groups>) allow you to categorize your project and campaign work in a way that is intuitive and easy to manage. Now when accepting requests and moving work items or projects, you'll have the option to add directly into a specific work group, saving time and ensuring you stay organized.

The image shows a screenshot of the 'Accept Request' dialog box in the inMotion software. The dialog has a title bar with a close button (X). It contains several sections: 'Work Type *' with three options: 'Project' (Multiple tasks and proofs), 'Task' (Stand-alone or independent work, selected with a green border and a checkmark), and 'Proof' (Work requiring review and approval). Below this is the 'Task Name *' field with the text 'Summer Scent - Video for Instagram'. The 'Add to Project' dropdown menu shows 'Summer Scent Social post'. The 'Work Group' dropdown menu is open, showing a list of options: 'Creative' (highlighted with a blue bar and a mouse cursor), 'Social Team Tasks', and 'Close Project'. At the bottom right, there are two buttons: 'Cancel' and 'Accept Request' (in green).

See More with Email Notifications!

The Form Template name will now show in request email notifications, providing more context into what is being requested.

Christy Drucker submitted a request:
